SAFARI

Wins the hunt for paying players with sure-fire appeal.

It s a jungle! A lone hunter faces four wild animals in blazing electronic combat. Game time is 90 seconds, with 30 seconds of extended play awarded for a score of 3,000 or more points.

When the hunter leaves the safety of his hut, he's fair game for the animals that charge across the screen. And the player loses game time if the hunter is struck down by an animal. The animals, safe from the hunter while they hide behind trees, come bounding out at increasing speed as the game moves on. Suspense, speed, surprises and sound combine to keep SAFARI in the center of the player and profit target!
